

Agr International, Inc. has served the packaging industry as a leading supplier of quality assurance equipment for over 90 years. We offer a wide range of equipment for the laboratory and on-line container production settings. Our equipment incorporates multiple technologies including infrared light absorption, sonic, capacitive sensing and vision-based technology.

Agr International, Inc. is located in Butler, Pennsylvania (approximately one hour north of Pittsburgh). For additional information about our company and products, please visit our website at www.agrintl.com.

We are seeking a **Manufacturing Test Technician** for our Manufacturing Department.

Job Summary:

This position is responsible for performing testing, troubleshooting, and repair of electro-mechanical manufactured equipment and sub-assemblies. This includes following prints, testing procedures, work guidelines, or standard practices to ensure product specifications are met.

Qualifications:

Education or Experience:

- Candidates must have 3+ years experience in a manufacturing testing or field service environment.
- Associate Degree in Electronics Engineering, Electronics Technology, or relevant field of study.
- Commensurate training and certification through applicable military experience and/or an accredited tech school will be considered.
- Knowledge of computer applications is a plus.

Knowledge and skills required:

- Knowledge of testing, troubleshooting, and repair processes related to electro-mechanical manufactured products.
- Strong electronics aptitude, including component level troubleshooting/repair.
- Good mechanical aptitude.
- Proficient at hand soldering.
- Ability to read/interpret blueprints, schematics and drawings.
- Ability to utilize/interpret tools, such as digital multimeters, oscilloscopes, and hipot testers.
- Ability to multi-task in a fast-paced environment.

Physical requirements/abilities:

- Ability to lift a minimum of 50 pounds with assistance.

Responsibilities:

- Perform testing, troubleshooting, and repair of electro-mechanical manufactured equipment and sub-assemblies, often requiring a high degree of precision.
- Follow prints, procedures, work guidelines, or standard practices to ensure product specifications are met.
- Support design improvements and changes to systems in manufacturing.
- Complete tasks that support manufacturing operations, such as design, documentation, implementation and validation of equipment and process changes.
- Perform all work in a safe manner, including proper use of personal protective equipment.
- Perform all work in accordance with acceptable quality standards.

We offer a competitive salary and comprehensive benefits package. For consideration, please email resume and cover letter to mfgtech@agrintl.com. U.S. Workers only. EOE.
